Introduction

Thank you for purchasing the LINDY 4 Port VGA Switch with audio. This switch allows you to connect the video & stereo audio output of 4 computers to a single monitor. The unit uses electronic switching technology rather than mechanical switching, for maximum reliability and durability.

Package Contents

- LINDY 4 Port VGA Switch
- 5V DC multi country power supply
- This manual

Features

- Supports VGA, XGA, SVGA, UXGA & Multisync monitors
- Electronic Switching Technology
- Allows the video output of four computers to be connected to a single monitor
- High resolution video support – up to 2048 x1536 @350Mhz
- Auto detect DDC, DDC2, DDC2B on each port
- Stereo audio supported
- Supports auto detect & select when new signals are attached
- Enhances video signals for long distance broadcasting (up to 50m)
- Computer selection via push button

Connections & Operation

Make sure all devices are switched off before making any connections! Once all the connections have been made, switch on the devices in this order: displays, VGA/Audio Switch, source device then any other devices.

Connect the 4 VGA & audio source devices to the input ports of the LINDY VGA Switch. Connect the monitor and speakers to the output ports of the LINDY VGA Switch

When all the devices are powered on the switch will detect source signals and the LED will display green.

Auto Switch: The switch will detect and new input signal and automatically switch to the live port.

Manual Switch: Select the required source by pressing the relevant button on the top of the switch.

Auto Scan (10 second intervals): To activate the auto scan function, press any of the top buttons for 2 seconds. To stop the auto scan, press any button again.

CE/FCC & Recycling Information

CE Certification

This equipment complies with the requirements relating to Electromagnetic Compatibility Standards EN55022/EN55024 and the further Standards cited therein.

FCC Certification

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. You are cautioned that changes or modification not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

WEEE (Waste of Electrical and Electronic Equipment), Recycling of Electronic Products

In 2006 the European Union introduced regulations (WEEE) for the collection and recycling of all waste electrical and electronic equipment. It is no longer allowable to simply throw away electrical and electronic equipment. Instead, these products must enter the recycling process.

Each individual EU member state has implemented the WEEE regulations into national law in slightly different ways. Please follow your national law when you want to dispose of any electrical or electronic products. More details can be obtained from your national WEEE recycling agency.

Germany

Die Europäische Union hat mit der WEEE Richtlinie umfassende Regelungen für die Verschrottung und das Recycling von Elektro- und Elektronikprodukten geschaffen. Diese wurden im Elektro- und Elektronikgerätegesetz – ElektroG in deutsches Recht umgesetzt. Dieses Gesetz verbietet das Entsorgen von Elektro- und Elektronikgeräten über die Hausmülltonne! Diese Geräte müssen den lokalen Sammelsystemen bzw. örtlichen Sammelstellen zugeführt werden! Dort werden sie kostenlos entgegen genommen. Die Kosten für den weiteren Recyclingprozess übernimmt die Gesamtheit der Gerätehersteller.

France

En 2006, l'union Européenne a introduit la nouvelle réglementation (DEEE) pour le recyclage de tout équipement électrique et électronique.

Chaque Etat membre de l' Union Européenne a mis en application la nouvelle réglementation DEEE de manières légèrement différentes. Veuillez suivre le décret d'application correspondant à l'élimination des déchets électriques ou électroniques de votre pays.

Italy

Nel 2006 l'unione europea ha introdotto regolamentazioni (WEEE) per la raccolta e il riciclo di apparecchi elettrici ed elettronici. Non è più consentito semplicemente gettare queste apparecchiature, devono essere riciclate. Ogni stato membro dell' EU ha tramutato le direttive WEEE in leggi statali in varie misure. Fare riferimento alle leggi del proprio Stato quando si dispone di un apparecchio elettrico o elettronico.

Per ulteriori dettagli fare riferimento alla direttiva WEEE sul riciclaggio del proprio Stato.
